SUMMARY

I am a proactive web developer with proficiency in HTML, CSS, JavaScript, and Python. I possess a strong background in building engaging web applications while continuously seeking to learn and adopt new technologies. My training in Django, along with my academic projects and extracurricular involvement, underscore my commitment to excellence and innovation in software development.

TRAINING

Trainee

NetMax Solution

📅 07/2023 - 12/2023   📍 CHD

Training and Program focused on web development.

- Acquired comprehensive knowledge of Python for web development using the Django framework during the intensive 6-month training program at Netmax.
- Developed practical skills in building dynamic web applications, including backend development, database integration, and frontend interaction
- Successfully completed hands-on projects and assignments, demonstrating proficiency in Django-based web development techniques and practices

EDUCATION

B.Tech in Electronics and Communication Engineering

Lyallpur Khalsa College Technical Campus Jalandhar
CGPA: 7.5

📅 07/2020 - 7/2024   📍 Jalandhar

CERTIFICATION

SQL Course

Completed a comprehensive SQL course covering key concepts such as database design, querying, normalization, and SQL techniques

Project Display Participation

Received a participation certificate in a project display event organized by our college, demonstrating teamwork and the ability to present technical projects effectively

VLSI Design Training

Gained hands-on experience in VLSI design and fabrication techniques, learning about modern semiconductor technologies, circuit design, and the implementation of VLSI systems

Logo Competition Participation

Earned a participation certificate in a college-organized logo competition, highlighting engagement in creative design endeavors within the academic community

KEY ACHIEVEMENTS

⭐ **Dynamic Web Application Development**

Success in developing dynamic web applications through training and showcasing key projects like Cafe-Bharat and Crest Land.

SKILLS

API Arduino Arduino IDE bootstrap CSS Database Design Django django framework Git Github HTML Javascript Jupyter jupyter notebook PyCharm Python react.js Redux SQL tailwind django framework Git Github tailwind css vercel Visual Studio Windows

PROJECTS

Bharat-Cafe

▣ Live Dashboard

A modern e-commerce platform for coffee lovers

- Developed a responsive e-commerce platform for Bharat Cafe using React.js, Context API, Tailwind CSS, and Framer Motion, enabling seamless shopping for coffee products and equipment across mobile and desktop devices.

Crest Land

▣ Live Dashboard

A modern platform for real estate showcasing with animations and user interactivity.

- Built a modern real estate platform with React, Tailwind CSS, and Framer Motion, featuring animated property showcases, interactive UI, and secure admin controls for seamless management

INTERESETS

💡 **Badminton**

Participated in badminton sports competition in 2021.

🎖 **Cultural Events**

Participated in Diwali fest in 2021.
